Portfolio Objectives

The Harding Ethical Cautious to Moderate Short Portfolio aims to deliver capital growth over the short term, targeting returns that exceed average inflation rates. The portfolio is designed for investors comfortable with limited investment risk and modest fluctuations in value. This portfolio should be chosen by those looking to invest for 3–7 years. This portfolio has an additional construction step in which all funds go through an Environmental, Social & Governance (ESG) screening process, to be used by those with these investment preferences.

Portfolio Information

Inception Date	07/12/2022
Current Portfolio Yield	4.05%
Benchmark	IA Mixed Investment 0-35% Shares
Weighted Fund Charge (% p.a.)	0.50%
MPS Management Fee (% p.a.)	0.20%
Number of Funds in Portfolio	10

Portfolio Construction

Harding’s Managed Portfolio Service uses a disciplined, research-led process combining EValue’s strategic asset allocation with quarterly tactical insights. Our proprietary Harding Helper system applies strict quantitative screening and platform checks to build diversified, risk-aligned portfolios, which are then refined through qualitative oversight from the Investment Committee. Every model is governed through robust monitoring and a full audit trail to ensure consistency, transparency, and strong client outcomes.

Q3 2026 Evaluate Asset Class Outlook

Interest rates and inflationary pressures are both now significantly higher than before the war. That has pushed nominal returns up and real returns down across the board. For now, the effects are stronger in the short term.

Among equity markets, the US is most improved, but not by enough to offset another wooden-spoon-winning quarter.

Emerging markets individually are a very mixed bag, with fortunes depending on how much they depend on oil imports and how much they benefit from a bounce in the dollar, but overall prospects benefit from the higher return environment.

The losers are Japan and other fuel importers, for whom the resulting shift in terms of trade will be an obstacle for some time.

Between recent strong performance and the following pressure on prospects, expected relative gains from equity and credit investments are under pressure.

Commodities as a basket might well benefit from further oil price rises, and maybe higher prices for agricultural goods, but the war spiked precious metal prices, and weaker demand will be a drag on base metals, so overall impact is little changed.

Higher interest rates weigh on property market expectations.
